#### EXPLORATORY UTILITY POTHOLING WORK TO TAKE PLACE ON SECOND, MINNA AND MISSION STREETS

Monday, October 26, 2009 – Monday, November 9, 2009

<b>WHAT</b>	Potholing work on Second Street at Minna and Natoma, Minna Alley at Shaw and First Street, and Mission Street between Beale and Main, using a jackhammer, air probe and vacuum excavation equipment.
<b>WHEN</b>	Monday, October 26 – Monday, November 9 from 8 a.m. to 4 p.m.
<b>WHERE</b>	Second Street, between Minna and Natoma Streets Minna Alley at Shaw and First Streets Mission Street, between Beale and Main Streets
<b>IMPACTS</b>	Construction-related noise and possible loss of traffic lanes and on-street parking.
<b>SAFETY</b>	Please stay clear of jack hammer, vacuum excavation equipment and excavated potholes.

The Transbay Joint Powers Authority (TJPA) will undertake exploratory utility potholing work beginning Monday, October 26, 2009, and continuing through Monday, November 9, 2009, on Second, Minna and Mission streets.

The potholing is being conducted to positively identify the location of existing wet utilities to support engineering for the construction of the new Transbay Transit Center.

Hours of potholing will be 8:00 a.m. to 4:00 p.m., Monday through Friday.

Traffic control, construction equipment and a vacuum excavator truck will be staged along the roadway, and in some cases will temporarily displace on-street parking or require the closure of a traffic lane. Following completion of the potholing work, the holes will be backfilled and repairs will be made to the street surface as consistent with San Francisco Department of Public Works regulations. The long-term use of the street and parking spaces will not be affected.

We appreciate your cooperation and apologize for any temporary inconvenience. For more information, please contact Courtney Lodato or Adam Alberti, Transbay Outreach Team, at (415) 227-9700.
